Sargol

Super Negin

Different type of Saffron

1. Negin

Negin Saffron is longer compared to Sargol and may contain some yellow part of the thread. This kind of saffron has the highest aroma and coloring power among the other kinds. This is considered as the best quality.

2. Sargol (All Red)

Sargol is all red threads of the saffron flower. It is often considered second in quality to Negin saffron due to broken threads. It has very high coloring power.

3. Pushal

This kind of saffron contains stigma along with a part of style (yellow part). Due to presence of style, its aroma is high. It is common saffron sold.

4. Bunch

Bunch includes all parts of saffron. It contains both style (yellow part) and stigma (red part). This yellow and red part are together and tied by a string as a bunch of saffron.

Damask Rose

Damask Rose is one of the most valuable plants for export. Persian Rose is the best species worldwide, due to amount of essential oil and fragrance. The special products of Damask Rose are rosewater, oil and dried water. This flower is commercially harvested for rose oil which is used in perfumery and to make rose water. The flower petals are edible. It may be used as a flavor in food, as garnish as an herbal tea.
